**Renotification of offshore substances and materials according to "OSPAR" recommendation 2012/5 on a Harmonised Offshore Chemical Notification Format (HOCNF) pursuant to the rules of Miljøstyrelsen (the Danish Environmental Protection Agency).**

01 June 2016

Dear Sir or Madam

Our file  
*Mentioned below*  
Our ref.  
FAA  
Tel: +45 7220 8974

Arbejdstilsynet, Produktregistret (the Danish Working Environment Authority, the Register of Chemical Substances and Materials), has received the re-notifications from your company of

Trade name	PR-No.	File No.
ZOK mx Gold Standard	1325895	2006-7321-72214
ZOK 27 Gold Standard	904043	2006-7321-72320

The information is evaluated not to be so extensive that the assignments of new PR-Nos are needed.

Therefore, the company may still use the same PR-Nos for the products.

The PR-Nos are registration numbers, which solely confirms that the products are notified. Therefore, the PR-Nos cannot be regarded as an approval of the products.

Produktregistret must be informed of any significant change in the already notified information. This includes changes in the composition and/or changes in the danger labelling of the products.

According to the HOCNF guidelines, offshore products must be re-notified every third year at the least. If the re-notifications of your products are not received within 1. June 2019, the notifications will be cancelled and the PR-Nos may no longer be used.

Kind regards

*Fatima Özer Armagan*
